Boeing's Lifesaving Rules

Safety is a core value at Boeing. Some operations performed at Boeing are recognized as High Hazard Processes due to their potential for a serious injury or fatality. Lifesaving Rules go beyond regulatory requirements and are intended to reduce or eliminate the risks created when around or performing these processes and prevent life-critical incidents by increasing accountability for following safety policies and procedures.

Pedestrian/Vehicle

Follow safe driving and walking rules.

Chemical Processing

Control sources of hazardous chemical exposure.

Crane Operations

Plan lifting operations and control the load path.

Machine Operations

Operate machines safely.

Aircraft Towing

Keep myself and others safe during aircraft towing operations.

Hazardous Energy

Verify control of hazardous energy or a zero-energy state before work begins.

Working at Heights

Protect against falls and dropped objects while working at heights.
