Boeing does not use seawater.

1. Water data represents approximately 84% of operations by square footage.

2. Water-stressed areas are those with high or extremely high water stress in the World Resources Institute Aqueduct Model.

3. Two locations have on-site water sources — Palmdale (well) and Portland (reclamation).

1. Waste data represents approximately 83% of operations by square footage.

2. Hazardous waste is determined from U.S. EPA hazardous manifest or equivalent government shipping documents, with profile waste designations determining the type of waste and Management codes determining the disposal method.
